

## FUYL Cell™ by PC Locs

Perfect for BYOD... The FUYL Cell is a Charging Locker that is designed to individually store, charge and secure Laptops, Tablets, iPad devices or any other mobile electronic device.

- **No Stress. Safe and Secure.** FUYL Cells are designed to secure valuable mobile electronic devices - Tablets, Laptops, Cell Phones and more. Each FUYL Cell has five individually lockable compartments.
- **On the go charging.** Set up the FUYL Cell Charging Locker in any environment and create a secure charging and storage facility. Perfect setup for schools, universities, convention centres – anywhere mobile devices are used.
- **Modular and scalable.** Mount the FUYL Cell on a wall or stack them. It's your choice. The FUYL Cell is designed to adapt to your space.
- **Fully Ventilated.** No worries. Designed for passive ventilation to minimise heat during charging.
- **Easy to use.** Works just like a hotel safe. The FUYL Cell comes with digital locks for individual use 24/7.
- **Highly compatible.** Charge almost any device. Each compartment is fully equipped with a mains supply power outlet, as well as dual USB charging ports capable of delivering 2.1 amps. (iPad devices compatible)
  - Port A is configured for iPad, iPad Air or iPad mini devices capable of delivering 2.1 amps.
  - Port B is configured for the majority of other USB devices.
- **Available in 3 locking options.** Depending on your needs, you can customise the FUYL Cell with a locking option that suits your needs. Locking options available are as follows:
  - Digital Locking (PIN code)
  - Keyed Cam Lock
  - Padlock ready Wing Lock
- **Lifetime warranty.** PC Locs products are built to last. Conditions apply.

PC Locs... it just makes life easier.
