

Carrier 40 Cart™

Charge, store,
secure and
transport up
to 40 devices

Shared use. Baskets by PC Locs enable devices to be shared by multiple students or classrooms with ease. Ideal for Shared Use deployments.

Extremely portable. Baskets enable devices to be distributed in a fraction of the time compared to a traditional cabinet style cart.

Top sliding lids double as a work surface. The dual sliding lids can be used as a work surface in space-strapped classrooms.

Exterior charging status display. Quickly check the charging status of your devices without opening the cart.

Lifetime warranty. PC Locs products are built to last.²

Efficient charging. With ECO Safe Charge, the Carrier 40 Cart is capable of charging up to 40 devices simultaneously.

Compatible. Large Baskets by PC Locs are designed to accommodate almost any device, including larger chromebooks as well as most Tablets with covers.

Style meets functionality. For better work flow, the Carrier 40 Cart features 2 sliding top lids so that devices can be accessed faster, easier and by more users at once.

Highly secure. The new padlockable sliding lids secures your devices whilst they're not in use. Attach the heavy duty anchor kit for securing the whole Cart down.

It just makes life easier.

Designed to go where others can't. Stairs, rough terrain or want to split your set of devices? It's now easier with the Large Baskets by PC Locs. Baskets by PC Locs are designed to make deployments of devices faster, easier and safer, so that Teachers and IT Administrators can focus on creating an engaging learning environment.

- Durable and lightweight construction.
- Compatible with almost any device with or without cases up to 13 inches.

Cable management is easy in the Carrier 40 Cart. Side channels keep wires in place and make wiring simple. Included Velcro ties allow you to organise cables into groups of five to coordinate with included baskets.

External charging status display. Quickly check if your devices are charging with the external display window. ECO Safe Charge power management displays which bank of devices are charging as well as the charging mode that has been selected.

Safe, efficient and a future proofed power management system for charging 40 devices at once. How? ECO Safe Charge™ can handle the power requirements of almost any device by staging the availability of power to each bank of devices.

The top lids double as work surfaces. The dual sliding lids allows the top surface of the cart to be used as a work surface. Serving as an ideal space to place baskets of devices for easy distribution, the surface can also easily keep a projector, printer or other items on top of the lid in space-strapped classrooms.

Using Laptops or devices that are too big for the baskets?

The Carrier 40 Cart features a three level adjusting storage shelf. This allows users to install the optional device storage racks into Cart's storage area (which replaces the Baskets by PC Locs). The storage racks are designed to accommodate Laptops, Macbooks and other larger devices. Contact us for more details.

Specifications:

Dimensions (mm): 929(H) x 670(W) x 853(L)
